# 1. Import PDF files

1. Click the **Import PDF** button. Click Browse button to choose PDF files you want to convert. You can click Preview button to open the chosen PDF file and clarify.

2. Select page ranges to import: all or customize certain pages. Don't know which pages to import? The Preview window allows you to view each page of the PDF file.

3. Set page quality: Higher, High, Medium, Low and Lower.

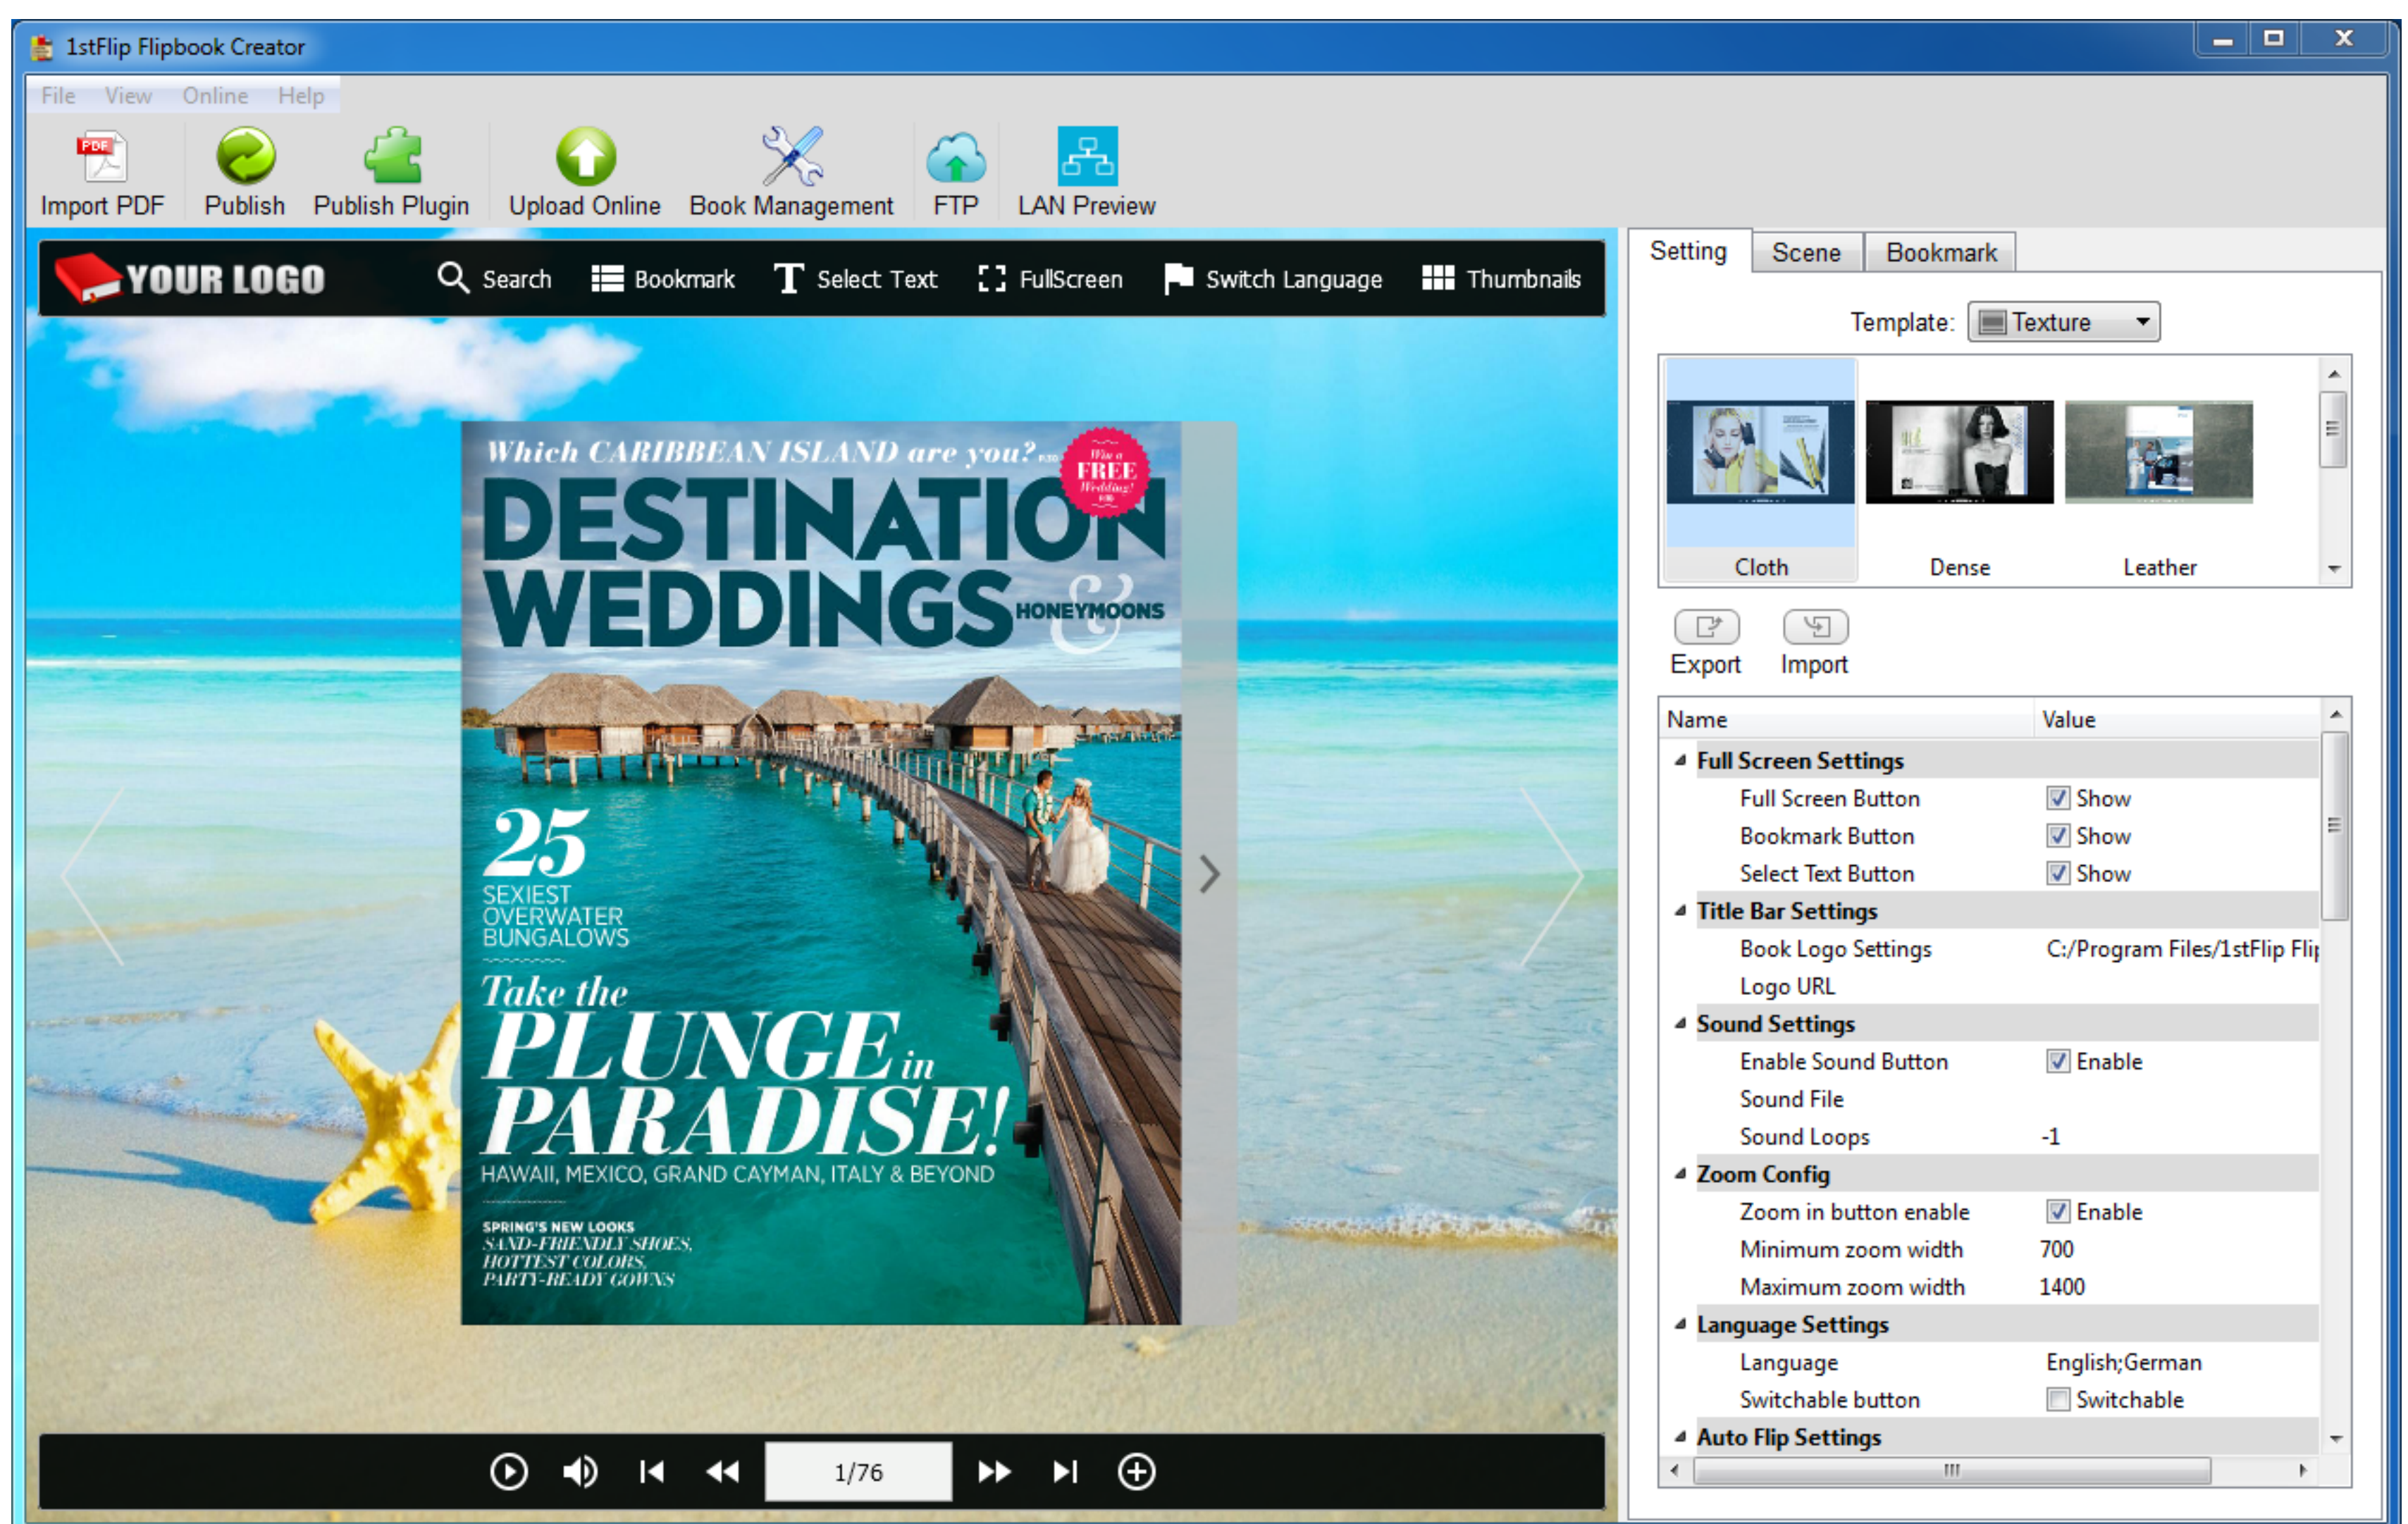

4. Choose page format: Vector(.swf) or Raster(.jpg).

5. Other import options:

- Import links: Links in the PDF file will be preserved in the converted flipbook if you check this option.
- Support searching: Search any content within the flipbook.

After all these settings, click Import button. Then you can see the PDF file in the interface. Now the page-flipping effect is added; what you see in the display area is what your flipbook looks like after publish and upload, so you may want to make some changes.

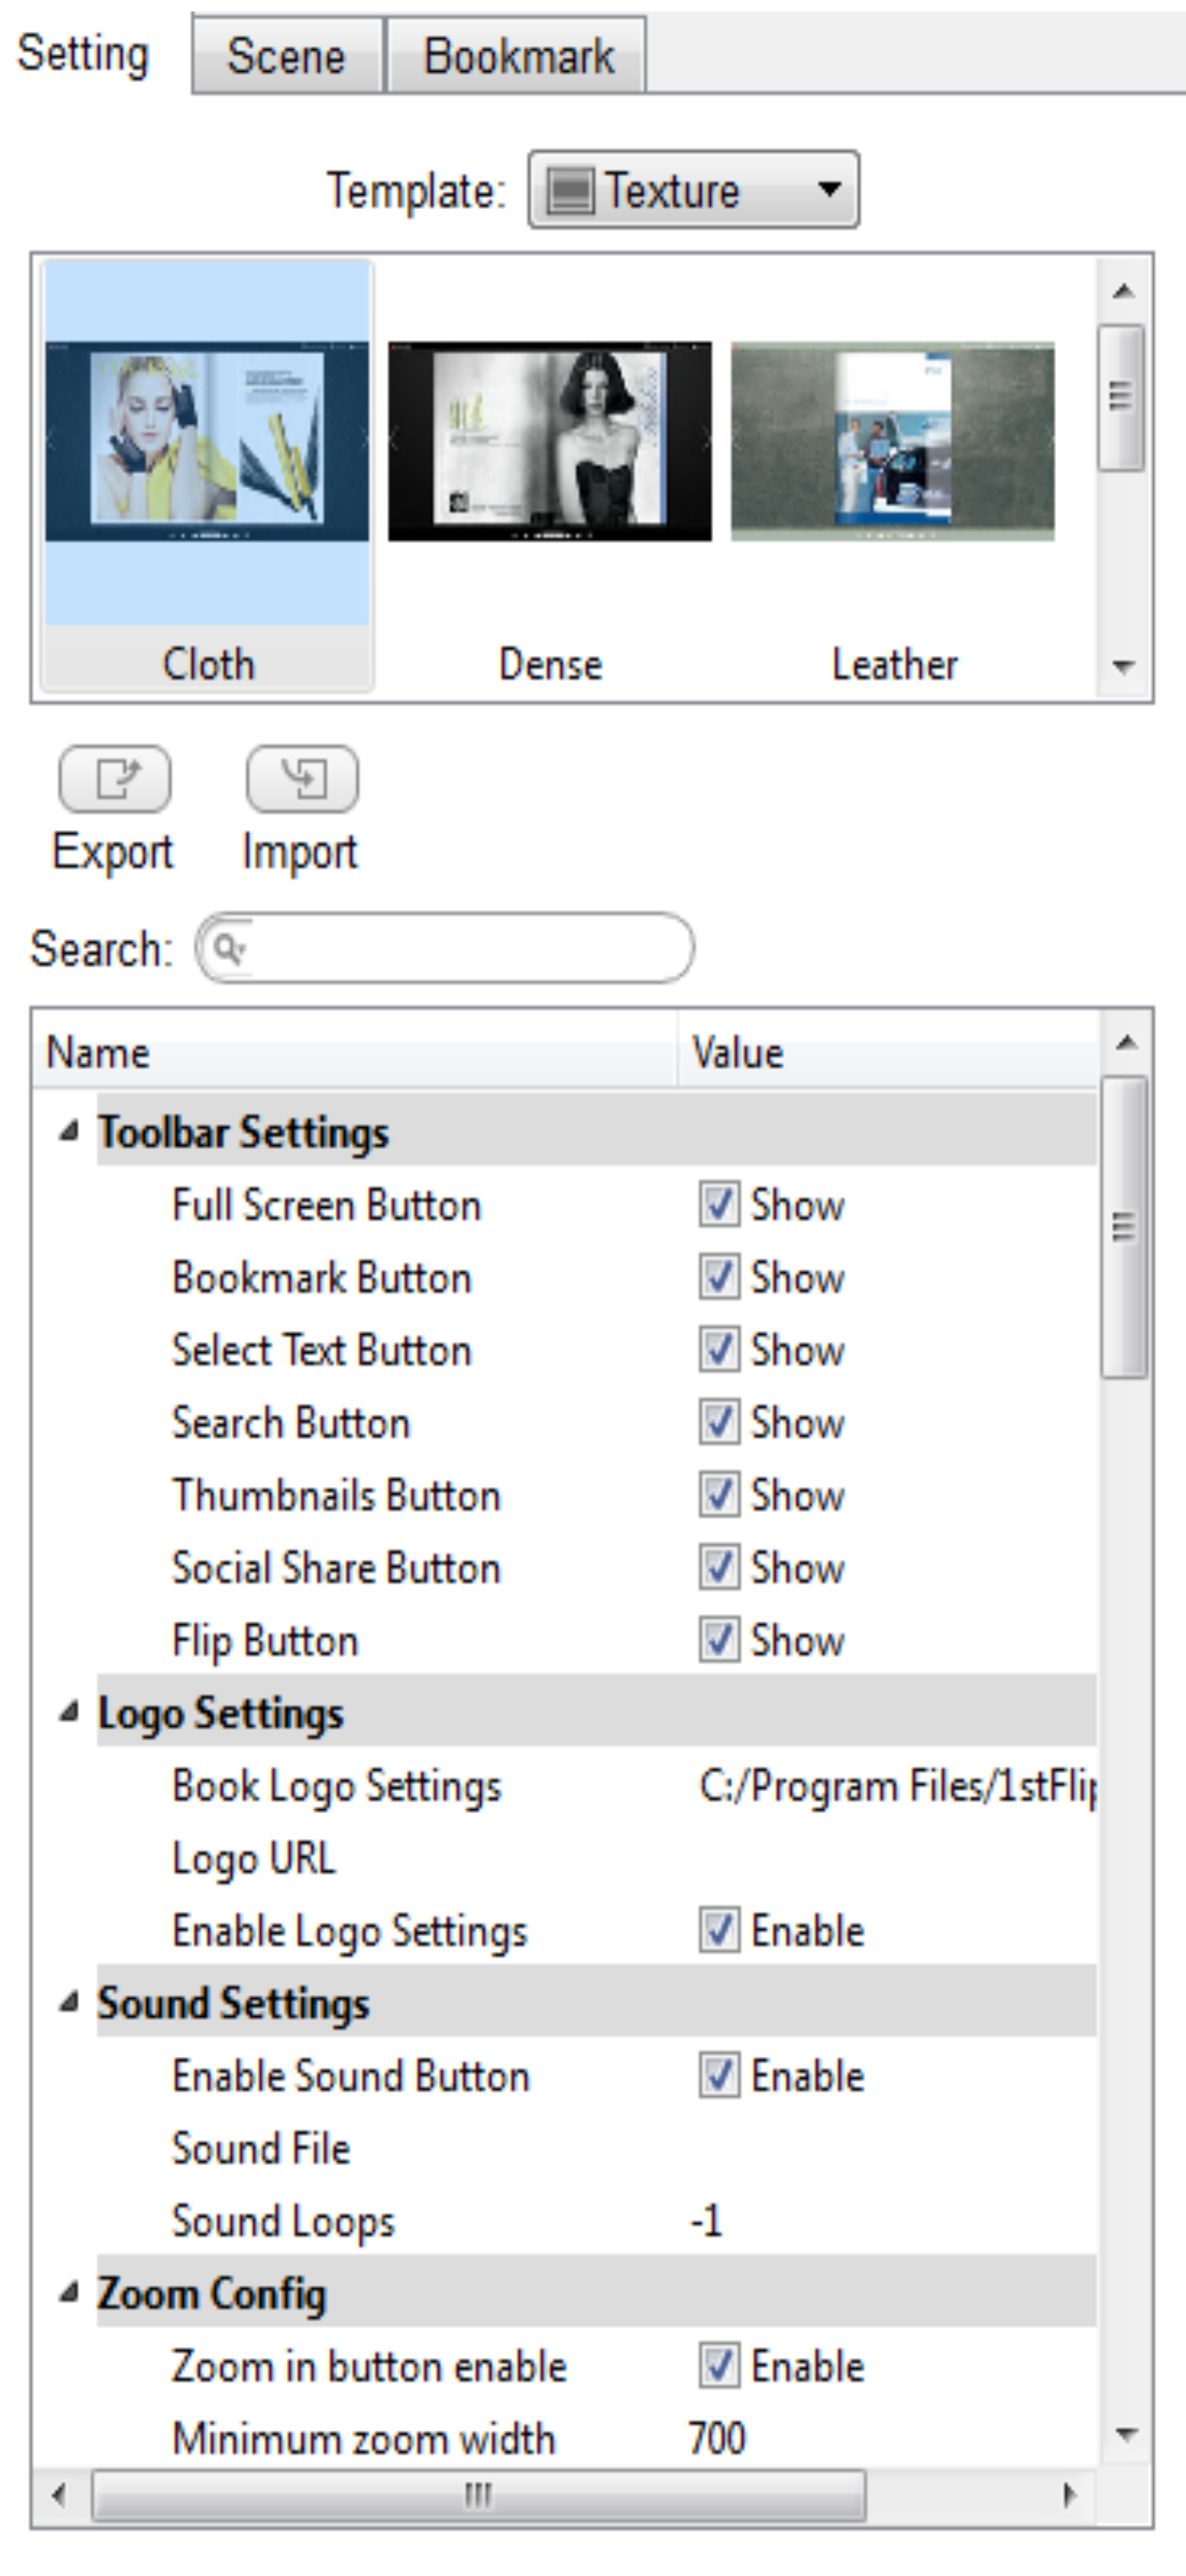

## 2. Setting, Template, Scene and Bookmark

As you can see from the right side of the interface, there are 2 tabs: Setting and Scene, which allow you to customize your flipbooks for the best reading effect.

- **Setting.**

This tab contains two parts: Template and detailed settings.

Template means how the flipbook toolbar is displayed. Here are two categories: Geometry and Texture, contains 5 samples respectively. Choose one you like. Besides, you can export and import samples.

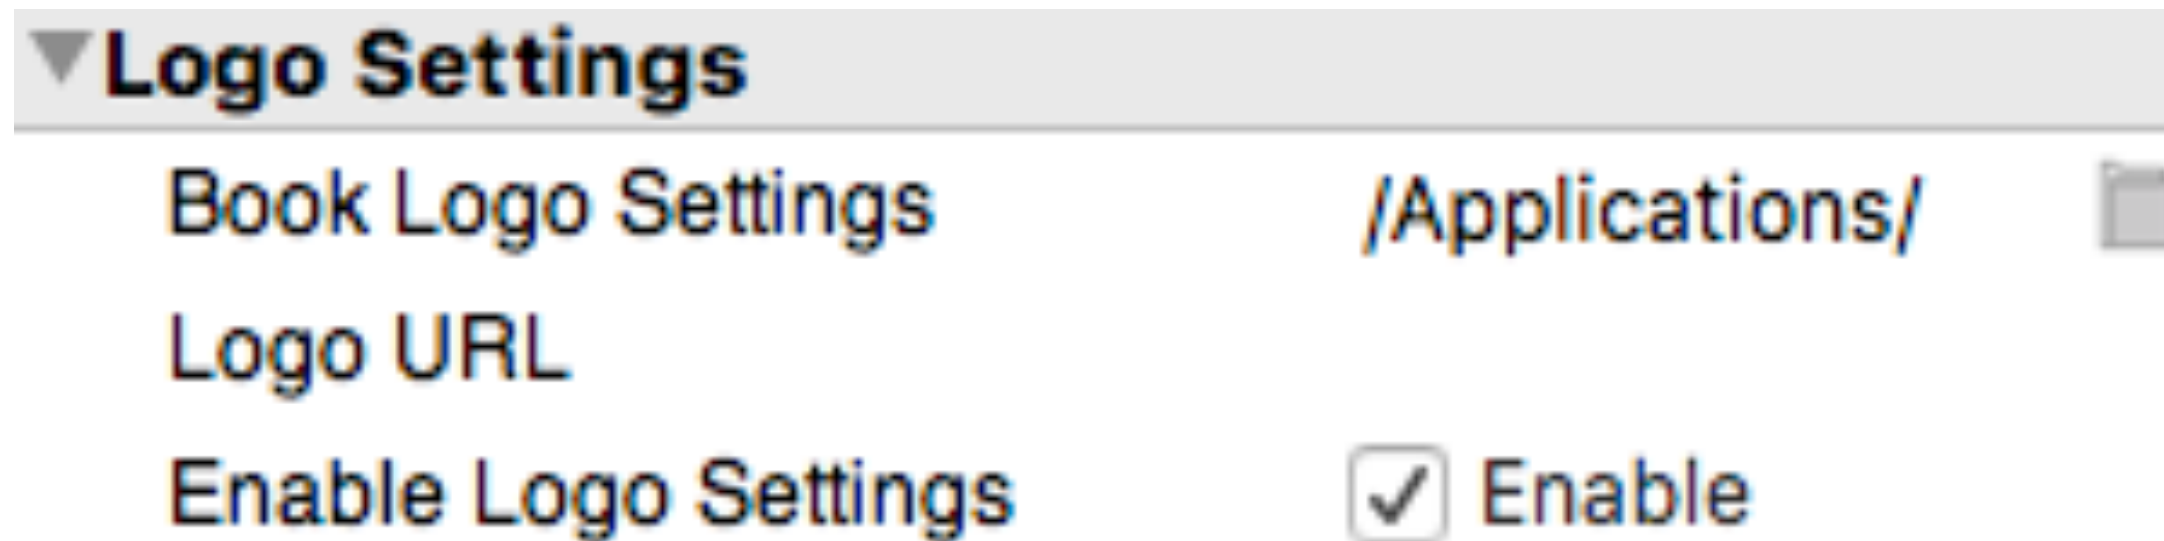

The detailed settings give you more options to customize templates as you like.
